Dr. Michael Amiridis
President
University of South Carolina - Columbia
206 Osborne Administration Building
Columbia, SC 29208

Dear Dr. Amiridis:

Thank you for submitting the following substantive change:

Substantive change:
**OCIS Approval Limited Review
Fort Mill High School
215 North Highway 21 Bypass
Fort Mill, SC 29715**

Submission date:
12/15/2022

Intended Implementation date:
8/1/2023

Case ID:
SC020419

As part of the review of the submission, additional information was requested by email. The institution's response (April 28, 2023) has been incorporated into the originally-submitted materials.

Current offerings toward the Associate of Arts (AA) and Associate of Science (AS) programs at the off-campus instructional site (OCIS) consist of traditional in-class, onsite, and distance education methods of delivery. Demand for additional courses is a result of population growth and demographic changes in the target population, and expansion of programming at the OCIS will better serve constituents in the adjacent communities. York County is the seventh largest county in South Carolina with population growth of 29.73% since 2010, underscoring the need for programming expansion. The initiative will operate from the University of South Carolina Lancaster (USC Lancaster), approved as the Lancaster branch campus in the SACSCOC database.

All courses scheduled at the OCIS meet specific requirements for the Carolina Core (general education core for baccalaureate degrees) or meet specific requirements for associate degrees. A tentative schedule of courses and course descriptions were included for all dual enrollment sites in the same school district as courses and faculty are the same for all sites (clarified by email). Admissions requirements for acceptance in the dual enrollment program are higher than those for traditional and transfer students, and requirements are delineated on the admissions section on the USC Lancaster website.

A Faculty Roster Form for full-time and part-time faculty was provided for spring/fall 2022. As verified by email, the same faculty assignments noted on the roster will be applicable for the tentative 2023-2024 cycle. Faculty qualifications and adequacy of faculty appear appropriate. Keep in mind that the ultimate determination of faculty qualifications is the responsibility of the peer review team who will assess the program as part of the institution's next SACSCOC accreditation review.

No new library resources will be needed to serve the OCIS. The Medford library at USC Lancaster is 36 minutes from the high school, and students may request physical materials for pick up at that location. Library holdings are accessible offsite, and holdings to support the initiative were discoverable through a scan of the library's webpage. As clarified by email, students are made aware of library and learning resources during orientation sessions (in person and through digital information), course syllabi, and individual course orientation.

Established student support services will be extended to students at the OCIS (list provided). Admissions and support services will be available on site as needed, and academic tutoring is provided through the Academic Success Center at Medford Library with sessions scheduled face to face or online.

Classrooms have been allocated to accommodate programming, and each classroom has appropriate instructional technology. No major equipment purchases are anticipated, and small purchases (consumable supplies, document cameras, unique course needs) will be absorbed in the annual site budget. Projected revenue comes from student enrollment based on the High School Lottery Tuition Assistance Program rate to offset salary costs. A five-year projected budget noted positive net revenue beginning with the first year of the initiative. Financial support appears adequate, and contingency planning was provided by email.

All academic courses are assessed through course evaluations, onsite observations, and through USC assessment procedure. Course evaluations encompass instructional quality, adequacy of facility and library resources, technology, and faculty availability. Learning outcomes for students taking courses at the OCIS are included in the annual assessment reports for all associate degree programs. Assessment data are aggregated by academic program, and faculty, administration, or leadership may request data by campus location if needed.

The site will be reviewed, and may include a site visit, as part of the institution's next fifth-year and/or decennial review.

The Board of Trustees of the Southern Association of Colleges and Schools Commission on Colleges reviewed the materials seeking approval of the Fort Mill High School off-campus instructional site (OCIS). It was the decision of the Board to approve the site and include it in the scope of accreditation.
